1. Click the **SubmitOrder** button located in the upper right corner.
2. A congratulatory message will appear, along with a summary of your requisition.
   CU Marketplace will send an email notification to the approver(s).

**Step #5: Receive appropriate approvals**

After the requester submits your shopping cart as a requisition, CU Marketplace routes your requisition for financial approval. Financial approval is given by a Fiscal Staff Approver on the SpeedType.

After financial approval is obtained, CU Marketplace routes your requisition for PSC approval. Once approved by the PSC, your requisition will convert into a PO. The requester will receive an email notification from CU Marketplace. Your PO is communicated to the supplier to place your order.

**PO Payment Procedure**

First, let’s begin by reviewing the payment cycle illustrated on page 1:

PO is communicated to the supplier.

Supplier submits invoice(s) for payment.

Do online receiving to authorize invoice to pay.

Once your order is placed with a supplier, referencing your PO number, the supplier must submit an invoice to receive payment.

   If the PO total amount is over $5,000, online receiving is required to authorize each invoice to pay – regardless of the dollar amount of the individual invoice.

If you receive the invoice prior to the Procurement Service Center (PSC), email the invoice to **APIInvoice@cu.edu**.
An email notification is sent to the requester and any approvers once the invoice is entered as a voucher into CU Marketplace. You can then review the voucher online. The requester (or receiver) should complete online receiving.

**Do online receiving to authorize invoice(s) to pay:**

1. Begin by logging into your portal and accessing the CU Marketplace.
2. Locate your PO using one of the following methods:

• If a line is not part of this receipt, remove it by clicking the Remove Line button.

5. Click the Complete button located in the lower right corner of the page.

6. A confirmation page will appear noting the receipt and PO numbers.

In some cases, a supplier might send multiple shipments to fulfill one PO. For example, an item could be on backorder, or a large order might be shipped in multiple boxes which could be separated during shipping. Because of this, it is possible to perform receiving more than once on a given PO.
