### **RESEARCH INTERESTS**

My interests lie at the intersection of hydrology, biogeochemistry, geology, and climatology. My research is broadly focused on understanding physical and biological controls on hydrologic partitioning and connectivity in the Earth's critical zone. I am interested in understanding how critical zone structure influences hydrologic processes and function. By analyzing long-term hydrologic, geochemical, and meteorological data sets my research extracts quantitative signatures of the co-evolution of critical zone structure and function. Furthermore, I am interested in the interaction between hydrologic and ecological systems, in the context of surface water – groundwater interactions. I use a combination of in-situ data collection networks, time-series analysis, and physically based deterministic modeling to quantify interactions between physical and biological systems.

### **EDUCATION**

#### **University of Colorado, Boulder, CO**

Doctorate of Philosophy in Civil Engineering, focus in Water Resources, 2017

Advisor: Michael N. Gooseff

#### **The Pennsylvania State University, State College, PA**

Masters of Science in Civil Engineering, focus in Water Resources, 2012

Advisor: Michael N. Gooseff

Bachelor of Civil Engineering, focus in Water Resources, 2010

### **EMPLOYMENT HISTORY**

#### **Institute of Arctic and Alpine Research**

Postdoctoral Research Scientist, May 2017 - present

#### **Institute of Arctic and Alpine Research**

PhD Research Assistant, 2015 – May 2017

#### **Department of Civil Engineering, Colorado State University**

Research Assistant, 2013 – 2015

#### **Department of Civil and Environmental Engineering, The Pennsylvania State University**

Research Assistant, 2010 - 2013

### **AWARDS AND HONORS**

#### **\* American Geophysical Union Horton (Hydrology) Research Grant**

Awarded December 2015, \$10,000

#### **University of Colorado, United Government of Graduate Students Travel Grant**

Awarded October 2015, \$300

#### **American Geophysical Union 2014 Fall Meeting Outstanding Student Paper Award**

### **RESEARCH EXPERIENCE**

- Development, implementation, and maintenance of long-term hydrological observational networks
- Modeling reactive solute transport in streams and rivers with OTIS (USGS One-Dimensional Transport with Inflow and Transient Storage model).
- Land-surface moisture and energy balance modeling with NCAR Community Land Model
- Numerical modeling of permafrost thermodynamics with UAF Geophysical Institute Permafrost Laboratory (GIPL) Model
- Numerical model development with MATLAB
- Four field seasons with the McMurdo Dry Valleys Long-Term Ecological Research Project.
  - (Nov. – Feb. 2012-13) Member of Stream Team, maintained a 19-site stream gauge network, frequently sampled stream chemistry and discharge

- (Jan. 2014) Designed and constructed a 5-site active layer monitoring network, completed January glacier mass balance measurements
- (Nov. 2014) Maintained 5-site active layer monitoring network, completed November glacier mass balance measurements
- (Jan – Feb. 2016) Designed and implemented a groundwater sampling network for Horton Research Grant Project, collected stream algae samples, completed January glacier mass balance measurements
- Three field seasons (Jun. – Sept. 2010-12) with NSF funded Changing Seasonality in Arctic Stream Networks Project
  - Designed and conducted nutrient enrichment injection experiments
  - Designed and implemented a 3-stream surface water and groundwater monitoring networks

#### **TEACHING EXPERIENCE**

- **Surface Water – Groundwater Interactions**, Colorado State University, 2015, Substitute Instructor
- **Groundwater Hydrology**, Colorado State University, 2014, Substitute Instructor
- **Open Channel Hydraulics**, The Pennsylvania State University, 2011 & 2012, Substitute Instructor
- **Hydrogeophysics Field Methods**, The Pennsylvania State University, 2011, field instructor

#### **Professional Service**

- American Geophysical Union Hydrology Student Subcommittee (H3S) student member (2015 – 2017). Co-organized two Pop-Up sessions and the Student and Early Career Conference at the 2015 AGU Fall Meeting.

#### **Professional Society Membership**

- American Geophysical Union
- Geological Society of America
